

MICROGUARD

Chlorine Detergent-Disinfectant

Disinfectant Registration No. NRCS/8054/237691/990
**Registered to the NSF International Registration Guidelines
for Propriety Substances and Nonfood Compounds (2022)**
NSF Registration No. 170337

Composition:	Organic chlorine (15%) with detergents (10%) and corrosion inhibitors (5%).	
Classification:	Detergent-Disinfectant for cleaning and disinfecting equipment and surfaces in food-preparation and other areas.	
Action:	The detergent-system wets and helps to clean dirty surfaces, allowing for the active chlorine to destroy dangerous bacteria.	
Indications:	For cleaning and disinfecting equipment and hard surfaces in food preparation and other areas.	
Warnings:	Contains organic chlorine. Do not mix with acids, ammonia or other chemicals. Avoid contact of undiluted product with skin and eyes. Use protective equipment. See batch number and expiry date – Product expires after 2 years from manufacture. Use solutions within 12 hrs of mixing – do not store for longer.	
Properties:	<p>Form: White granular powder Odour: Chlorine Solubility: Completely soluble Foaming: Very Good Wetting: Excellent Emulsification: Emulsifies and lifts dirt pH of 1% solution: <10,5 Available Chlorine: 1 x 30g Sachet : 10L water = 250 ppm chlorine</p>	<p>Use in: Food preparation areas Fridges and cold rooms Butcheries and Bakeries Ablutions and Toilets Cleaning and Disinfecting</p>
Directions:	Use cold or warm water (not hot) for dilutions and stir to dissolve. General cleaning: 1 x 30g Sachet to 10L water provides 250 ppm chlorine Allow contact time of at least 30 seconds to 1 minute for disinfection. Rinse food equipment and food preparation surfaces with clean water.	
Precautions:	Do not mix with acid, ammonia or other chemicals. Do not use on brass or mild steel.	
Safety:	<p><i>Internal:</i> If swallowed do not induce vomiting. Drink plenty of milk or water and consult a doctor immediately. Chlorine can be neutralised with Sodium Thiosulphate 2,5% solution.</p> <p><i>In the eyes:</i> Flush well with running water and consult a doctor.</p>	
Identification:	White granular chlorine powder packed in distinctively printed sachets.	
Presentation:	100 x 30g sachets per carton and 500 x 30g sachets per carton.	
Storage Instructions:	Store in cool dry conditions under 30°C and away from foodstuffs. Keep apart from flammable material and protect from intense light. Keep out of reach of children.	
Composition:	Organic chlorine (15%) with detergents (10%) and corrosion inhibitors (5%).	
Classification:	Detergent-Disinfectant for cleaning and disinfecting equipment and surfaces in food-preparation and other areas.
