

triple green™

sappi

Triple Green Tissue range offers a sustainable and versatile selection of tissue products, produced in South Africa using sugarcane waste fibre (bagasse) and an Elemental Chlorine-Free process. These products are biodegradable, acid-free, and recyclable, catering to various sectors including home, office, medical, hospitality, and industrial applications

Sugar Cane fibre - An annually renewable source of sustainable fibre. The fibre is obtained from the remaining fibre after the sugar has been extracted.

Chlorine free bleaching - All pulp used is bleached using an elemental chlorine-free (ECF) process. The chemicals used to bleach complies with the World Health Organisation.

Sustainable afforestation - All wood fibre used is certified by the Forest Stewardship Council (FSC).

Available in:
Toilet Paper, Hand Towels, Wipers, Jumbo Rolls, Serviettes and Facial Tissues.
