

PRODUCT DATA SHEET

REFUSE BAGS 120L HEAVY DUTY

Revision date: 18.06.2026

Page 1 of 1

General Description

120-liter refuse bags manufactured from a 100% recycled HDPE/LDPE blend. Sized at 750mm x 950mm with a nominal thickness of 40 microns. Sold by guaranteed weight (52kg per 1000 bags) to ensure consistent material volume and performance.

Not suitable for direct food contact.

Note: Micron thickness is a calculated nominal average. Due to the extrusion parameters of 100% recycled resins, exact localized thickness varies. Manufacturing tolerance and yield are strictly controlled by weight (52kg per 1000 bags).

PROPERTY	VALUE
Size	750 mm width x 950 mm height
Weight	+ - 52kg per 1000 qty
Thickness	+ - 40 μ - microns (calculated average)
Material	Blend of high density and low-density polyethylene
Average Density	0.898 (g/ml)
Colour	Various Colours – Black / Smokey White
Percentage of Recycled Material	100%
