TUSK BRITE

Page 1 of 2

General Description

- Tusk Brite is a polymer floor dressing with a 22% solids content.
- It is used to seal a variety of sealable floors such as vinyl, linoleum, polished concrete flooring and some tiles such as natural stone tiles, terracotta tiles and stone quarry tiles.
- Tusk Brite provides a glossy, protective coating on a floor surface.

Advantages and Features

- Tusk Brite is available in liquid form and is easy to apply.
- Tusk Brite provides a surface that is easier to clean than the raw flooring surface.
- The 22% solids content means that it is a “high solids” formula comparing to other “low solids” products. (The solids content is the amount of material left after the applied product dries)
- A 22% solids content will provide a strong and resistant floor finish when applied in layers.
- It is impervious to liquids and will protect the flooring underneath.

Application

- Tusk Brite should only be used during a strip and seal floor dressing process and not as an additive to other cleaning products.
- Use undiluted and apply with a sealer applicator tool.
- Tusk Brite should be applied in layers with sufficient drying time in between application.
- Tusk Brite should be applied with a **minimum of 3 coats** in order for the first coats to penetrate into the flooring. More coats are required in higher traffic areas.

TUSK BRITE

Page 2 of 2

1. Product Technical Information

- Active Ingredients:
 - Polymer plasticisers
 - Coalescent additives
- Available in:
 - 5-Litre container
 - 20-Litre container
- Undiluted (Product is to be used undiluted)

2. Physical Properties

- Form: Liquid
- Colour: White
- Odour: Odourless
- pH: 6 - 10

3. First Aid Measures

- Eyes: Flush eyes with clean water for 15 minutes, if irritation persists, seek medical attention.
- Skin: Use PPE: Gloves. If contact with skin, wash well with soap and water.
- Ingestion: Do not induce vomiting. Drink plenty of water and seek medical attention.
- Inhalation: No effect.

4. Additional Information

Always use according to manufacturer's instructions.

The information contained herein is based on our current knowledge and experience at this time and summarises to the best of our knowledge the health and safety and hazardous information relating to the product.

The data is intended only as a guide for the handling and safety of the product. We do not assume any liability for the consequences of the use of this product, since it is applied under conditions beyond our control and with which we may be unfamiliar. Final determination of the suitability of use of the product for any particular purpose is the sole responsibility of the user.

Although certain hazards are mentioned, we cannot guarantee that these are the only hazards that exist. We believe the product will perform the task for which it is intended, but do not in any way guarantee it will do so as conditions of actual use are beyond our control, under no circumstances shall we or our agents be liable for any consequential loss arising from its use.
